## ■ Selling Points of the production process

From our in-house facility adjacent to the Vegi-Fru Stadium, we procure reliable vegetables from across Kyushu. This enables us to accommodate small-lot orders and offer season contracts that are unaffected by price fluctuations, ensuring we meet our customers' needs with a stable supply.

Additionally, leveraging Kyushu's advantage as a region that produces over one-third of Japan's strawberries, we supply commercial-use strawberries nationwide. While strawberries are primarily used in Western and Japanese confectionery, we offer a variety of cultivars suited to different applications.
