

*Half a century. Sustainable Quality.*

## Since 1971

Established in 1971 in Denizli, Turkey, ALTUNTAŞ is specialized in culinary herbs, spicy seeds, medicinal herbs, roots, and special products. Our mission is to be the reliable and purified spice manufacturer with higher quality above the standards matching our clients' specifications exactly.

We operate in two factories. **Altuntaş Baharat San. ve Tic. A.Ş.**, located in Denizli and **Altuntaş Agro Tarım San. ve Tic. A.Ş.**, located in Denizli Free Zone, operates under **Altuntaş Group Companies**. Our factories are based on finest production and reliable food technology implementations.

Our most important values rely on continuous improvement of our production with adequate lead times and delivery of our clients and business partners. With direct purchases from a vast network of suppliers, we utilize our geographical advantage by being close to the raw material / oregano especially. Our production facilities are able to keep the utmost quality control and produce accordingly for end use consumers.

We are known and in business with many market leading firms among many different geographies around the globe.

## From INDUSTRIAL usage to CONSUMER

### OUR PROCESSING LINES INCLUDE:

Pre-Cleaning Sieves, Fine Cleaning Sieves, Final Control Sieves, Indent Cylinders, Air Separators, Conveyors, Cyclones, Rare Earth Magnets, De-Stoners, Indented Cylinders, Gravity Separators, Cutting Mill, Hammer Mill, Disc Mill, Stone Mill, Metal Detectors, Machine Dryers, Electronic Color Sorter, Steam Sterilization chamber.

## Sustainable QUALITY

ALTUNTAŞ possesses **ISO 9001:2015, ISO 22000:2018, BRC, Kosher & Halal** quality and food administration systems certifications after a series of internal and external audits are conducted. Under **ISO 22000:2018** quality system, **HACCP** principles are in place and certified. Our steam sterilization chamber is also **Campden BRI** validated.

Each incoming product is tested by considering purity, chemical and physical properties of the product internally and externally. Visual and microscopic controls are in place to control adulteration possibility in the raw material. Our flexibility in production facilities enables us to produce for our industrial and end user packaging clients no matter how tough the requirements are. We combine this flexibility with our quality policy and our experience in the industry. In addition to all chemical, physical, microbiological analysis, we can conduct allergen analysis with our own **ELISA** and **PCR** test equipment.

### FOR STERILIZED PRODUCTS:

Microbiological parameters such as total plate count (TPC), yeast/mould, E.Coli, Salmonella, Coliform are tested after sterilization, (both internally at our in house microbiology laboratory and externally at accredited labs) under our standard quality procedures and positive released. We also test our products as per below parameters:

- Pesticide Residue Analysis
- Heavy Metal Analysis
- Aflatoxin Analysis
- Contaminant Analysis (such as PAH, PAs)
- Allergen Analysis (such as gluten, mustard, sesame, peanut, lupin, celery)
- Purity Tests (such as PCR, phenolic components determination tests)
- Illegal Dye Tests

## The FINEST TASTES from NATURE to you
