## UPCYCLING OF SAKE WITH UMAMI FLAVOR

### What's in our vegan cheese?

"Parmesan cheese flavor" is made from sake lees (sake kasu in Japanese). Under the theme of "disseminating Japanese ingredients to the world," we chose sake lees as something attractive. There are many plant-based cheeses made from cashew nuts overseas, but by using sake lees, you can express the aroma of fermentation and the richness of the flavor.

This is delicious! I had never used a product like this before and was nervous but gosh it's so good! I tried it on popcorn and it was a revelation; salt umami and savory. This would be delightful on pasta or pizza; it's crumbly in texture but has a slight crunch. Hard to describe it accurately but promise, it is really good.
