

## Biggalchan Red Pepper Powder, Here's Why It's Great!

01. We pursue consistent quality and taste by 100% contract cultivation with local farmers in Yeongnyang-gun.  
※ Every December, superior varieties are selected by the Red Pepper Variety Selection Committee  
(Good practice for products, quality evaluation criteria, etc.).
02. By completely removing the stems from red peppers and using only pure peppers for production, the taste is richer and cleaner.
03. We maintain a hygienic production process with red peppers undergoing three-stage washing, cutting, drying and milling.
04. The production system is equipped to produce red pepper powder with various specifications by pungency components (Mild, Medium, Hot), and particle size (for Kimchi, Seasoning, Gochujang).
05. This product is developed by the Yeongnyang Red Pepper Distribution Corporation, a public enterprise established as part of a government pilot project for globalizing premium red pepper products, and has obtained geographical marking approval from the National Agricultural Products Quality Management Service.

The sweat and  
dedication of farmers  
who resemble nature.
