

YOI WATER Alkaline Water

A Hidden Gem in the Palm of Your Hand

Located in the extreme south of Taiwan,
Pintung is a metaphor of purity, health and natural beauty.

More than a necessity, NAYAQUA offers a *healthy* and *inspiring lifestyle*.

Sourced from the natural wonder of the Mt. BAIDAWU in Taiwan,
YOI alkaline water is the jewel product resulting from hundreds of
years of filtration and purification, and presents a balanced and unique
natural mineral composition.

Born To Be The Best

- 💧 Naturally alkaline with a pH level of 8.1-8.4
- 💧 Natural electrolytes
- 💧 Naturally occurring essential minerals
Si Sr Ca Mg Na K P H₂SiO₃

Naturally Rich in Bicarbonate (HCO₃)

Naturally Nitrate Free

Solar Project

The roof-mounted scheme delivers 499kwp of naturally generated energy, which has avoided 300 ton of CO₂ being released yearly.

Solar Project

100% Recyclable Plastic

Naturally-sourced water has one of the lowest carbon footprints of any beverage. All our bottles are 100% recyclable, including label and cap; BPA-free.

Filtration Sterilization System

100% Utilization of Water Resource

Our product is bottled without additional bottle washing process, hence every bottle saves 0.5 or more liters water.

Dust-free Filling Workshop

100% Utilization of Water Resource

Energy-Saving Facility

Save 30% energy through investment in design and technology.

In-house Laboratory

The Third Party Certification / Seasonal Testing

The outstanding quality and unique mineral content of our alkaline water are regularly checked and validated by SGS Group and Taiwan Quality Food Association (TQF).

※ Manufactured by Chieh Hsiang Enterprise Co., Ltd. which is certified by the ISO 22000, HACCP that scrutinised at a yearly UKAS audit.

Optimized Proportion and Size

Always provides you with an easy, on-the-go refreshment.
Ideal size to avoid the growth of bacteria after opening.

Perfect for Meal and Wine Pairing

The extremely harmonious mineralization provides a smooth well-balanced taste and a sensation of softness on the finish, making our alkaline water suitable with every tasteful meal.

Bespoke and Premium Design

A sleek, modern, and elegant exterior that will work perfectly in any environment - from fine dining tables to your living space.

Ergonomic Bottle and Cap

Effortless easy open cap and the stream-lined bottle are balanced to allow you to open and grip comfortably for any occasion.

Best choice if you are suffering from :

- Excessive thirst and dry mouth.
- Weak immune system.
- Decreased metabolism.
- Irregular lifestyle, and feeling lethargic and stressed out.
- Unhealthy eating habits, craving strong sugary or salty tastes.
- Dryness, dullness, and uneven skin texture.
- Constipation issue caused by insufficient water consumption.

pH level _____ pH8.0-9.0 Alkalinity

Natural minerals and presence of bicarbonates impart a naturally alkaline pH.

Total Dissolved Solids (TDS) _____ 74.10 mg/L

Dissolved mineral solvents naturally present in water which aid heart health and create a velvety taste through your throat, with sweet aftertaste in your mouth.

Silicon _____ 4.27 mg/L

Essential trace mineral which is known for its beauty benefits. Revitalizes skin, teeth, hair, nails and brittle bones by aiding collagen formation.

Metasilicic acid _____ 9.80 mg/L

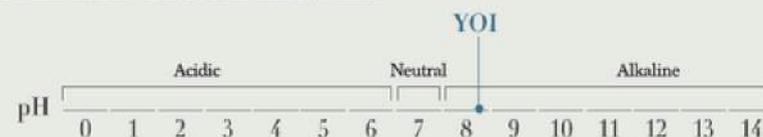

Reduces the lipid levels in your blood, and helps maintain a youthful skin tone and increases collagen levels.

Strontium _____ 0.038 mg/L

Supports bone formation, increases bone mineral density, and reduces the risk of heart disease.

Calcium _____ 8.50 mg/L

Fortifies bones, teeth and the nervous system.

Magnesium _____ 1.29 mg/L

Vital macro mineral necessary for healthy bone, brain, and heart functions. Helps control the body's immune response.

Sodium _____ 14.50 mg/L

Controls body fluids, promotes cell growth, relieves muscle cramps, and plays a vital role in nerve and muscle function.

Potassium _____ 0.9 mg/L

Regulates fluid balance, muscle contractions and nerve signals.

Phosphorus _____ 0.04 mg/L

Helps maintain normal acid-base balance by acting as one of the body's most important buffers, especially for erythrocyte and renal tubule.

Bicarbonate _____ 61.20 mg/L

Maintains the balance of acids and base pH value in the body. It is a natural component in mineral rich water.
