	Allergen (Specific Raw Materials)	

■ Company's profile

Company`s Name		Alambique de Oro (アランビクエ・デ・オロ)			
Annual Sales		Year 2025, 1,077,000,000.00	Numbers of Employees	70	
Name of Representative		Jimenez Teran, Aaron			
Messages to Purchasers		Caña de Oro has perfected the art of distilling an exquisite, accessible, and proudly Mexican cane liqueur. Our story intertwines with the fields of Morelos, bringing tradition and a free spirit to every bottle. The production process takes place under the supervision of our plant, located in the Cuevas del Cerro del Tepetate, where cutting-edge technology is combined with traditional methods to ensure the purity and unique flavor of our liqueur. Caña de Oro is more than just a cane liqueur—it’s a celebration of Mexican heritage, offering a high-quality product that is accessible to all.

■ Selling Points of the production process

<p>Sugar cane is planted and keeps growing for 8 months => Once it has reached certain amount of water and sugar level it is harvested => In site the juice is extracted to start fermentating with self growth bacteria => Once the sugar level is low enough it is distilled in 3 different destilators to provide different flavor and smells => Then the destiled product is set to 55 vol. alc. => Then Cana de Oro formula is mixed to obtain the final spirit beverage at 20 vol. alc.</p>		
Pictures		
		
Sugar cane is cultivated through 7 months prior to recolection and industrialization	Once recolected it is destilled on our facilities	Once destiled it is bottled and ready to sell
