

WELCOME

The Best Product

RaaLa Kithul celebrates one of Sri Lanka's rarest and most precious natural sweeteners—pure Kithul. Sourced from the blossoms of the wild Kithul palm found only in select forest regions, authentic Kithul is produced in very limited quantities, making it a true national treasure.

At RaaLa Kithul, we preserve the traditional craft of Kithul tapping while delivering a sweetener that is naturally low on the Glycaemic Index (GI) compared to refined sugar. This means Kithul releases energy more gradually, making it a preferred natural alternative for mindful and balanced living, when consumed responsibly.

The art of Kithul production is part of Sri Lanka's Intangible Cultural Heritage and closely aligned with UNESCO heritage values, protecting ancestral knowledge, forest ecosystems, and rural livelihoods. Every bottle supports sustainability while keeping a rare tradition alive.

From golden Kithul syrup to nourishing jaggery, pure Kithul from RaaLa is more than sweetness—it is rare, natural, low-GI, and deeply rooted in Sri Lankan heritage.

RaaLa Kithul — A rare low-GI natural sweetener, born in the forests of Sri Lanka.

Natural Goodness

Low Glycemic Index (GI):

Compared to cane sugar, kithul jaggery raises blood sugar more slowly; a stable energy source.

Rich in Nutrients

Unlike refined sugar, kithul retains minerals (e.g., potassium, magnesium) and vitamins.

Digestive Benefits:

Consumed post-meal, jaggery can aid digestion and promote gut health.

Antioxidant Properties

Kithul treacle contains antioxidants, combating oxidative stress and potential chronic diseases.

Natural Production

Kithul processing is more natural, potentially resulting in no additives or contaminants.

Cultural/Economic Benefits

Supporting kithul helps preserve cultural traditions and boosts local economies in harvest regions.

Good for People. Good for the Planet.
