Product Characteristics		Use Scenes (Usage +Recipes)	
Bioteem40 is a shelf-stable powdered coconut kefir formulated for convenience, quality, and versatility. The powder format allows for easy storage, transport, and integration into daily routines without refrigeration. Each formulation is fortified with essential vitamins and minerals that contribute to the maintenance of overall health. Custom flavor development is available upon inquiry, allowing partners to tailor the product to specific market preferences.		Blend with milk, coconut milk, water or almond milk. Delicious in smoothies or sprinkled on yogurt.

■ Selling Points of the production process

THERAPBIOS PHARMA LTD utilizes a proprietary, patentable production process that involves the microencapsulation of our ingredients and the addition of a mucoadhesive. This process protects our ingredients from oxidation and degradation throughout production and shelflife. Additionally, our proprietary encapsulation ensures that our ingredients survive the harsh conditions of the gastrointestinal (GI) tract, improving efficacy and enabling our ingredients to reach the colon. The colon is one of the most absorptive structures in our body, where we employ mucoadhesive technology to facilitate the binding of our ingredients to the mucus layer for sustained release, improving bioavailability and absorption.
