## ■ Selling Points of the production process

DOP Certified Origin:  
Produced within the protected geographical area of the Valle del Belice (Trapani province), in full compliance with the DOP Valle del Belice specifications, guaranteeing origin and authenticity.

Single Cultivar Excellence:  
Made exclusively from Nocellara del Belice olives, a prized Sicilian cultivar known for its strong identity, freshness, and balanced intensity.

Careful Harvesting:  
Olives are harvested at the optimal ripening stage to preserve aromatic complexity and ensure a high-quality extra virgin olive oil.

Cold Extraction Process:  
Mechanical cold extraction using a continuous cycle system preserves natural aromas, flavor balance, and nutritional properties.

Controlled Storage:  
The oil is stored in stainless steel tanks under controlled temperature conditions to protect it from light and oxidation.

Precision Bottling:  
Modern filling and bottling lines ensure consistency, safety, and product integrity across all formats.

Secure Sealing:  
Each bottle is sealed with anti-refill or standard caps, ensuring freshness, traceability, and compliance with international regulations.

Quality-Focused Packaging:  
Every unit is carefully labeled, packed, and palletized to guarantee safe handling and transport.

Bono DOP Valle del Belice represents the authentic expression of a unique Sicilian territory, combining tradition, certified origin, and rigorous quality control throughout the entire production process.
